PROFILE SUMMARY

Detail Oriented **Full Stack Engineer** with **3 years** of experience building **scalable web applications** and internal platforms using **TypeScript, React, Node.js**, and **PostgreSQL**. Experienced in developing **interactive UI** components, **dashboards, RESTful APIs**, and workflow automation systems. Strong understanding of **HTTP, REST APIs, JSON**, and modern frontend development practices, focused on building maintainable, scalable, and high-performance applications.

TECHNICAL SKILLS

- **Frontend** : React.js, Redux Toolkit, Context API, React Flow, HTML5, CSS3, JavaScript (ES6+), Typescript, REST APIs, JSON, AJAX.
- **Backend** : Node.js, Express.js, NestJS.
- **Database**: PostgreSQL, MongoDB.
- **ORM**: TypeORM
- **Cloud & Integrations** : Google Cloud Platform, Stripe API, Nylas API.
- **Architecture & Concepts** : RESTful APIs, Usage-Based Billing, Webhooks, RBAC, Agile/Scrum, SDLC
- **DevOps & Tools**: Git, GitHub, CI/CD, Docker, NPM, Yarn, VS Code, Vite.

WORK EXPERIENCE

BRAINERHUB SOLUTIONS

Ahmedabad | 2023–Present

Software Engineer – Full Stack

1. ABA–Engine – Healthcare Organization Management System

- Built **interactive UI** components for scheduling, planning boards, and communication modules, improving workflow management and collaboration.
- Architected **PostgreSQL schemas** using **TypeORM** across multiple modules to support subscriptions, usage **tracking, invoicing**, and **payment workflows**.
- Designed **data visualization** dashboards using **Bold BI** to **track scheduling trends** and revenue insights.
- Developed scalable **RESTful APIs** using **Node.js and Express**.
- Built an advanced **scheduling system** supporting recurring, group, and availability-based sessions.
- Built an **automation workflow** system enabling admins to configure triggers (emails, reminders, credential checks, form requests) executed via scheduled cron jobs.
- Integrated **GCP email** services and Nylas APIs to build an in-app email interface supporting compose, draft, reply, inbox management, and platform notifications.
- Developed **task management** features and integrated **Stripe APIs** and **webhooks** to support product creation, **usage-based billing**, and subscription lifecycle management.

2. SaveForLater – Collaborative Knowledge Platform

- Designed space-based **multi-user architecture** with structured resource management.
- Implemented **public/private access control** and multi-user follow system.
- Built multi-level **commenting system** including global and space-level discussions.
- Developed backend APIs using Node.js and designed relational database schema in PostgreSQL.
- **Dockerized** the Node.js application, created **Dockerfiles**, and managed containerized deployments to ensure consistent development and production environments.
- Integrated **LangChain.js** with Gemini LLM to power chatbot interactions and AI-driven content processing.

EDUCATION

- **National Institute of Science and Technology** , Berhampur ,Odissa
Bachelor of Technology (Information Technology)

2019–2023
